#BetterThanTape

A complete range of Hypafix® solutions that reliably stays in place over time where surgical tapes might not adhere as well.

Leukoplast®

Wound care in best hands

What is the current challenge with fixation?

Surgical tapes can often do the job...

...but, having listened to your concerns, we know that sometimes they might not adhere as well.

Consequences:

The use of a suboptimal solutions can cause discomfort or unreliable fixation.

This can lead to a delay on wound healing and extra time and money for additional dressing changes.

Weak fixation of a tape may look like this:

Swelling dressing

Moving joints

DAY 1

DAY 3

DAY 8

Hypafix[®] solutions that hold up where surgical tapes might not adhere as well.

Long-term fixation

Complete coverage of dressing or device
(protection against water or contamination)

Body contours or joints

**Coverage of a wide area/
large dressings**

Heavy medical devices

Fixation of advanced wound dressings
(e.g. swelling dressings)

... and here we have the solution with our complete reliable **Wide Area Fixation Range**, our best solutions with high performance.

Hypafix[®] wearing test

Source: proderm test 21.0371-79 n=30

Our Solutions:

A complete range of Hypafix® solutions that reliably stays in place.

Reliable fixation for any situation due to ...

STRONG ADHESION

To keep devices and dressings securely in place up to 7 days.*

STRETCHABILITY

Secure fixation, even on body contours and moving joints. Can be up to 10 times more stretchable than paper tape.

BREATHABILITY

Avoids moisture accumulation to ensure reliable adhesion.

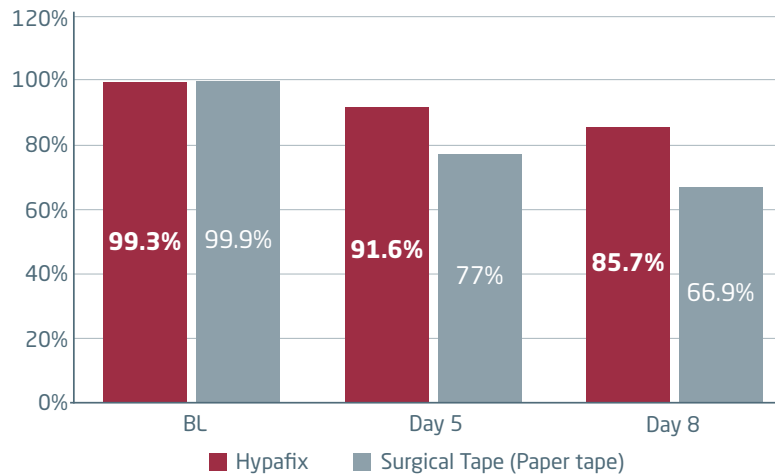

*only valid for Hypafix and Hypafix transparent

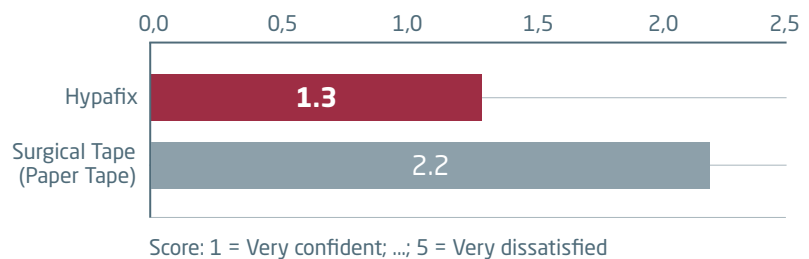

Reliably stays in place

Objective Evaluation of Percentage Adhesion

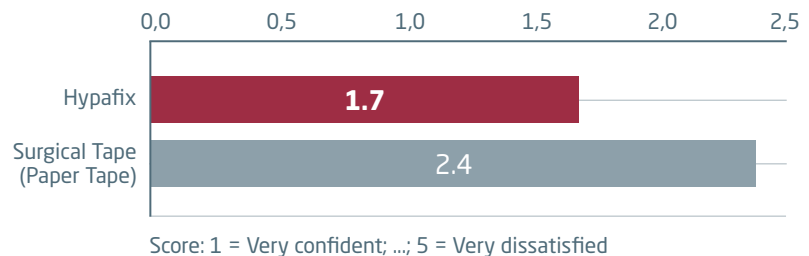

High satisfaction of study participants

How do you assess the overall adhesion property of the product?

How was the condition of the dressing after the wearing time (e.g. lifted edges, wrinkles)?

Leukoplast®

Hypafix® Complete Range

Discover our reliable solutions for any fixation challenge

Leukoplast®

Hypafix®

For secure fixation even on body contours and moving joints

Leukoplast®

Hypafix® transparent

For waterproof fixation that protects against contamination

Leukoplast®

Hypafix® *skin sensitive*

For fixation on fragile skin with atraumatic removal

Proven effectiveness and reliability

- **Secure Fixation** for up to 7 days (dressing & devices)
- **High stretchability** for joints or moving body parts
- **Breathable** to help prevent skin macerations
- **Pliable:** Very comfortable to wear

- **Secure Fixation** for up to 7 days (dressing & devices)
- **Waterproof** film allows to shower
- **Transparency** enables inspections of wound environment
- **Protection** against contamination
- **Breathable** to help prevent skin macerations
- **Protects** against friction

- **Secure Fixation** of dressings
- **For fragile** and compromised skin
- **Atraumatic** removal helps to reduce the risk of adhesive related injuries
- **Minimal pain** at dressing removal
- **Repositionable**
- **Breathable** to help prevent skin macerations
